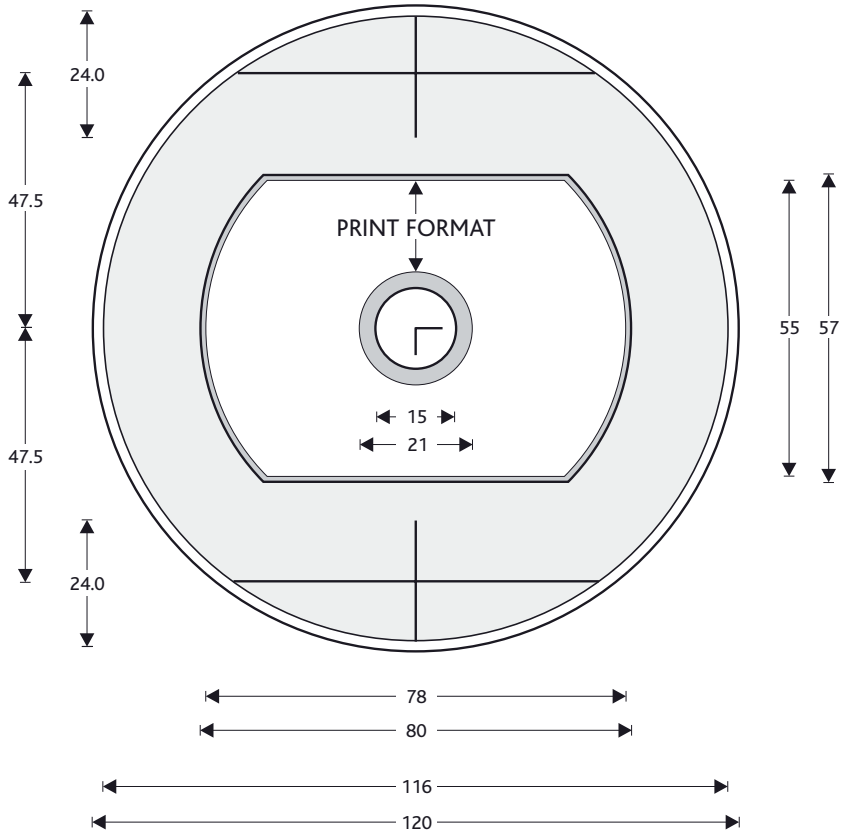
CD PRINT SPECIFICATION

310:card.21®, Classic-Label



In addition to our specifications for silk-screen and dry offset label print and the general CD pre-mastering specifications, the following parameters apply for the card.21® :

Design:
The card.21® is a product which does not conform to the Philips©/Sony© specifications. Therefore the Compact Disc logo cannot appear on the label or printed products.Trouble free playing of a card.21® can be guaranteed in most CD drives (except slot-in drives).
The card.21® classic-label is available as a cut or moulded version.

Max. capacity:
Cut version: maximum 32 MB or 3 min 38 sec.
Moulded version:maximum 30 MB or 3 min 25 sec

CD format:
Outside diameter 80 mm, height 57 mm,centre circle diameter 15 mm

Print format:
Outside diameter 78 mm, height 55 mm,centre circle diameter 21mm

Position mark:
The cut version is printed on a 120 mm diameterCD.Two register marks with a thickness of 0.3 mm must be incorporated in black or in another high-contrast colour above and below the motif in such a way that the outermost point of the vertical line of the register mark is positioned at the 116mm diameter and points to the centre.
