

CD PRINT SPECIFICATION
312:card.21[®], Small-Label

In addition to our specifications for silk-screen and dry offset label print and the general CD pre-mastering specifications, the following parameters apply for the card.21[®] :

Design:

The card.21[®] is a product which does not conform to the Philips[®]/Sony[®] specifications. Therefore the Compact Disc logo cannot appear on the label or printed products. Trouble free playing of a card.21[®] can be guaranteed in most CD drives (except slot-in drives).

The card.21[®] classic-label is available as a cut or moulded version.

Max. capacity:

Cut version: maximum 32 MB or 3 min 38 sec.

Moulded version: maximum 30 MB or 3 min 25 sec

CD format:

Outside diameter 80 mm, height 57 mm, centre circle diameter 15 mm

Print format:

Outside diameter 78 mm, height 55 mm, centre circle diameter 21 mm

Position marks:

The cut version is printed on a 120 mm diameter CD. Two register marks with a thickness of 0.3 mm must be incorporated in black or in another high-contrast colour above and below the motif in such a way that the outermost point of the vertical line of the register mark is positioned at the 116 mm diameter and points to the centre.
